

SOLARAECHO LITE

ATMOSPHERIC DELAY + SHIMMER + CRYSTAL

CINEMATIC ATMOSPHERIC DELAY

SolaraEcho Lite is a streamlined delay and atmosphere engine designed for instant inspiration and beautiful spatial movement.

Add depth, shimmer, and space to any sound with a clean, intuitive workflow.

EASY TO USE

Everything you need. Nothing you don't.

CINEMATIC SOUND

Shimmer, crystal, and diffusion for rich atmospheres.

CREATIVE FREEDOM

From subtle texture to glowing ambient soundscapes.

CONTROLS EXPLAINED

MIX

Sets the balance between the dry signal and the processed delay.

DELAY

Sets the delay time. Time in milliseconds when unsynced, note division when synced.

FEEDBACK

Adjusts the amount of signal fed back into the delay for more repeats. High settings may self-oscillate.

SHIMMER

Adds octave-up harmonic content to the reverb tail for a luminous atmosphere.

DIFFUSE

Controls the density of reverb smearing applied to the delay repeats.

TONE

Tilts the tonal character of the repeats. Lower = darker. Higher = brighter.

CRYSTAL

Adds pitch-shifted diffusion for shimmering, crystalline textures.

WIDTH

Controls the stereo spread of the repeats. Wider values create a more immersive soundstage.

SPACE

Expands the overall space of the delay for a wider, more open atmosphere.

LITE IS ALL YOU NEED

Beautiful delays. Instant inspiration. Limitless sound.
